Sherkin Island,  
Skibbereen, Co.Cork. Ireland.

## Careers in Science

**Fishing** – Fish are an important part of our diet. There are many different types and many ways in which to catch them.

**Aquaculture** – This is the farming of fish, shellfish and seaweeds.

**Biology** – This is the study of living things such as animal and plant life.

**Chemistry** – Chemists are needed in industry to change raw materials into useful materials i.e. food, drugs etc.

**Physics** – Physicists study the science of matter and energy and the interactions between the two.

**Veterinary Science** – Be a doctor for zoo animals, farm animals and pets.

**Teaching** – Teach subjects such as Biology, Chemistry and Physics in schools, colleges or other centres.

Ever thought about working in science? Here are some areas in science that may interest you!

**Zookeeping** – Zoos need helpers to care for and look after the animals in the zoo.

**Museum Work** – This can involve looking after the museum, the displays and giving tours of the science exhibits that are on display.

**Agriculture** – A chance to breed and look after animals and to grow and harvest crops.

**Landscape Gardener** – Design and develop gardens.

**Environmental Control** – This can involve studying and preventing pollution.

**Wildlife Photographer** – The chance to photograph animals and plants for nature books, newspapers and magazines.

**Radio and Television** – This can involve planning, gathering information and presenting nature programmes.

**Publishing** – Many publications need writers, artists and designers to create them.

**Research** – You could work in a lab to study how and why things happen in science.

**Park Warden/Ranger** - Look after parks and nature reserves.
